

Dr. Frank Sposaro

EXPERIENCE

PowerPlatform, Copilot Studio

2023-2025

Northeast Region, Microsoft

- Orchestrated cross-functional workshops to align business goals with technical implementation, ensuring stakeholder buy-in and actionable outcomes.
- Streamlined reporting workflows by automating complex data pipelines, reducing manual efforts by 80%.
- Optimized application performance through data model enhancements and advanced query designs, improving system responsiveness by 30%.
- Delivered tailored Power Platform training to upskill business users and foster a self-sufficient innovation culture.
- Led the integration of third-party services with Power Platform solutions, enabling seamless interoperability and expanding system capabilities.
- Developed governance policies for secure and scalable adoption of low-code solutions across the enterprise.
- Collaborated with senior leadership to prioritize business needs and define key performance indicators (KPIs) for strategic projects.
- Managed a portfolio of concurrent Power Platform projects, ensuring timely delivery while maintaining quality standards.
- Performed root-cause analysis to identify and resolve critical production issues, improving system reliability and end-user satisfaction.
- Designed user-friendly dashboards and visualizations in Power BI to enhance decision-making processes at all organizational levels.
- Facilitated data migration projects from legacy systems to Dataverse, ensuring data integrity and compliance with organizational standards.
- Implemented CI/CD pipelines for Power Platform solutions, increasing deployment efficiency and reducing errors in production environments.
- Contributed to enterprise innovation initiatives by prototyping AI-enhanced applications using Power Automate and Azure Cognitive Services.
- Built dynamic approval workflows to streamline operational processes, reducing approval cycle times by 50%.

Adjunct Faculty

2023-2025

Computer Science, Florida State University

- Designed Low-Code Application Development course
- Remotely taught course

Power Platform Lead Architect

2020-2023

Northeast Region, Microsoft

- Spearheaded enterprise solutions by orchestrating business and technical teams
- Directed strategic planning sessions with stakeholders to define project scope, success metrics, and roadmaps for digital transformation initiatives
- Facilitated workshops and strategic planning sessions with stakeholders to define project scope, success metrics, and roadmaps for digital transformation initiatives.
- Translated business needs into technical designs using Visio
- Reported on success metrics using Power BI and Azure products
- Defined enterprise data strategy and oversaw development
- Answered HR enterprise questions with Bot using CoPilot Studio
- Advanced digital transformation by identifying strategic workloads
- Managed the development and deployment of an integrated Power Platform app for a theme park's production kitchen, coordinating with business units and engineering teams
- Integrated Power Platform Canvas App with University's security cameras
- Migrated Software Marketplace to Dataverse and enforced RBAC
- Created PowerVirtualAgent to assist customers with training

- Cultivated a community of low-code/no-code developers, mentoring engineers and facilitating knowledge sharing across teams to accelerate project delivery
- Established an ALM process and governance framework to ensure compliance and scalability in enterprise environments

Cloud Solution Architect. Power Platform Developer

2018-2020

Strategic Accounts, Financial Services, Microsoft

- Led cross-functional teams to deliver high-impact AI and cloud-native solutions, managing stakeholder expectations and delivering within deadlines
- Acted as the primary liaison between development teams and executive leadership, ensuring business goals were met with scalable technical designs
- Oversaw the project lifecycle, including requirement gathering, sprint planning, and post-implementation reviews, achieving consistent project success
- Increased revenue by 10% MoM after deploying cloud audit solution
- Solidified business cases by facilitating conversations with leadership
- Architected cloud native solution to solve business needs using Azure
- Planned roadmap to take product through development to production
- Completed milestones across pre and post sales pipeline with Dynamics
- Unified data into Dataverse with Dataflows + Azure Data Factory
- Accelerated time to market for tax solution by optimizing CI/CD pipeline
- Optimized operating efficiency by implementing agile practices at scale
- Supported questions by Auditors using Power Virtual Agents with Dataverse

Software Development Engineer

2013-2018

Xbox Store, Microsoft, Redmond, WA

- Managed development roadmaps and feature prioritization, balancing stakeholder requirements with technical constraints to deliver high-impact projects
- Mentored junior developers and coordinated with product managers to define and prioritize feature roadmaps, balancing user needs and technical feasibility
- Led full-stack engineering efforts for e-commerce platforms, coordinating with product managers to align development milestones with business objectives
- Championed data-driven decision-making, presenting insights to executives that influenced feature roadmaps and improved user engagement metrics
- Drove the design and deployment of scalable solutions, providing insights from both a technical and a business perspective
- Mentored team members on agile practices, promoting efficiency in development processes and collaboration across teams
- Reached millions worldwide by creating multi-platform e-commerce store
- Shipped high revenue features by leading full stack engineering efforts
- Drove user inclusion by advising team on accessibility excellence
- Influenced feature roadmap by making data driven decisions
- Mastered scrum process and advocate for proper planning and reliable execution
- Enabled app/AAA game/multimedia purchases. downloads and installs
- Speed development velocity by managing build infrastructure with ADO
- Decreased cross team resource needs by publishing reusable components

Research Programmer, Tech Lead

2010 - 2013

FSU Computer Science Department, Tallahassee, FL

- Prototyped medical monitoring framework using Android Platform and sensors
- Automatic fall detection and alert using triaxial accelerometers

Microsoft Student Partner

2012 - 2013

Florida State University, Tallahassee, FL

- Engaged with Microsoft developers, partners, MVPs
- Community outreach, Brand ambassador, Event host
- Drove 100+ applications to publication on Windows 8 Store

	<i>Android Developer</i> iMobile3, Jacksonville, FL - Automated build and installation process including lint and test reports - Designed unit test framework for Android apps - Wrote RoamPayX, a client side payment app	2012
	<i>Software Engineer, Intern</i> Android Contacts App, Google, Mountain View, CA - Programmed UI for favorite contacts in the Phone and People Applications - Designed code for various screen sizes and resolutions - Documented and fixed various bugs for the release of Ice Cream Sandwich	2011
	<i>Electronic Arts Campus Rep</i> Tri-Sqox Marketing, Redwood City, CA - Managed public relations with clients at Florida State - Planned, executed, documented 150+ promotional events	2004 - 2011
	<i>Research Programmer</i> Traffic and Criminal Software, FSU College of Engineering, Tallahassee, FL - Prototyped law statute matching software using C# - Created GPS Library with Visual Studio 2008 using C# - Automated scripting for build environment using NAnt	2008
	<i>Software Engineer II</i> ARINC, Oklahoma City, OK - Simulated KC-135 MIL-STD-1553 aircraft data bus using Harris SecNet 11 - Data analysis on RS-232 hardware GPS system with XML and C++ - Designed multiresolution, event driven GUI interfaces in VB.NET and C# - Automated user tasks for aircraft pilots using Windows and Unix scripts	2007
EDUCATION	Florida State University - Computer Science. PhD <i>2015</i>, Masters <i>2012</i>, Bachelors <i>2008</i> - Vision Training, Mobile Medical Monitoring, Android System Research - Master of Computer Science <i>2012</i> - Bachelor of Computer Science <i>2008</i>	2004 - 2015
CURRENT CERTS		
COLLEGIATE INSTRUCTOR	Course Co-Founder, Primary Instructor - Mobile Programming: Windows 8 Application Development - Mobile Programming: Android Application Development	2010 - 2013
	<i>Teacher's Assistant</i> C++, Comp Lit, Comp Ethics, Data Structures, Web Programming	2007 - 2010
PUBLICATIONS	Programming Trends on Smartphones BEAT: Bio-Environmental Android Tracking iWander: An Android Application for Dementia Patients iFall: A Cell-Phone Based Fall Detection and Warning System Indoor Tracking of Geriatric Patients Using Bluetooth Geriatric Medical Application Suite on a Sweet Phone iFall: An Android Application for Fall Monitoring and Response	Feb. 2013 Jan. 2011 Sept. 2010 Apr. 2010 Mar. 2010 Mar. 2010 Sept. 2009
