PROFILE

AI Enablement and Strategy leader with 20+ years of progressive technology experience, including 6+ years leading and developing engineering and architecture teams — spanning hiring, performance feedback, career development, and cross-team portfolio direction across complex, matrixed organizations. Proven track record building AI value dashboards and ROI frameworks, reimagining SDLC and value-stream workflows around AI, and driving culture shifts toward AI-native, AI-fluent teams at enterprise scale. Skilled at influencing senior stakeholders and translating executive priorities into sequenced roadmaps with measurable outcomes.

EXPERIENCE

Principal Cloud Solution Architect, Application & Innovation 2020–2026
Microsoft, Remote

Operating as Agentic AI Architect, Professional Services 2025–2026

- Lead multiple technical workstreams in partnership across Professional Services, setting AI vision and strategy with enterprise clients and translating it into multiphase roadmaps, operating models, and governance with clear owners and milestones.
- Serve as formal team lead for 3–5 engineers and architects, owning work allocation, prioritization, and career development planning.
- Participate in Microsoft hiring loops for engineering and architecture roles and deliver Connects feedback that directly informs team members' performance reviews.
- Own KPIs, ROI frameworks, and value-tracking approaches connecting AI initiatives to business outcomes, accelerating delivery timelines by 30%, while establishing enterprise AI governance (secure landing zones, agent intake, DLP guardrails, ALM) across Engineering, Product, and InfoSec.
- Own portfolio view and risk management across concurrent AI workstreams, reimagining the AI delivery value stream – from intake through governance to operations – to reduce friction and accelerate safe adoption.
- Partnered with Big 4 professional services firms to design repeatable, pre-approved architecture building blocks that eliminated per-engagement InfoSec sign-off, cutting deployment time by an estimated 80%.

Operating as Customer CTO AI Advisor, Strategic Accounts 2023–2025

- Served as a de facto technical executive to enterprise customers – partnering directly with customer CTOs and business leadership to align AI vision – while directing Microsoft's sales and specialist teams to translate that vision into execution and report progress back to stakeholders.
- Enabled scalable, compliant adoption of custom agents and Copilot capabilities across regulated environments.
- Automated data ingestion, migrations, and CI/CD pipelines using Azure Functions, cutting manual effort by 80% and accelerating delivery by 40%; designed optimized data models improving performance by 30% and reducing decision latency by 25%.
- Designed and deployed AI-enhanced applications using Python and Azure Cognitive Services, increasing processing accuracy by 25%, and implemented AI-agent observability with Azure Monitor and Application Insights, reducing MTTR by 70%.
- Designed and led a dozen-plus enterprise agent-building hackathons across Big 4 professional services and other strategic accounts, ranging from small team sessions to 600+ global participants, producing hundreds of prototype AI agents and applications and driving adoption strategy buy-in.
- Built a real-time operations solution for a major theme park operator's centralized kitchen, replacing an overloaded legacy ordering system with Power Platform.

Operating as Power Platform Lead, Financial Services 2020–2023

- Directly managed and grew a regional Power Platform architecture team of 4 architects and 2 specialists, partnering with Customer Success Account Managers to source and scope new engagements, and led enterprise digital transformation initiatives across multiple industries.

- Drove Power Platform and Copilot Studio adoption from pilot to full enterprise scale – 320,000 licenses deployed across the customer’s workforce – building conversational AI agents using Power Virtual Agents (the direct predecessor of Copilot Studio) for HR, training, and self-service use cases, establishing hands-on AI agent experience years ahead of the platform’s formal AI rebrand.
- Mentored architects and developers, fostering a community of practice around scalable low-code and AI solutions, and established ALM and governance standards adopted across multiple enterprise customers.

Azure Architect & Cloud Migration Lead 2025

Independent Consultant, JM Family, Deerfield Beach (*via DrFrankDoes, LLC*)

- Directed multiple concurrent project teams – each comprising a Project Manager, Solution Architect, Security Architect, Engineer(s), and Product Owner – overseeing execution across parallel AI and cloud migration initiatives from discovery through InfoSec sign-off.
- Produced architecture diagrams, runbooks, and migration playbooks enabling delivery teams to execute cutovers with minimal disruption.

AI Platform & Copilot Consultant 2023

Independent Consultant, JM Family, Deerfield Beach (*via DrFrankDoes, LLC*)

- Established Power Platform and Copilot governance spanning environment strategy, security, and DEV/UAT/PROD lifecycle management; mentored junior AI engineers on discovery, ambiguous problem framing, and translating business objectives into actionable engineering requirements.

Senior Cloud Solution Architect, Apps & Infra 2018–2020

Strategic Global Customer, Microsoft

- Architected cloud solutions aligned to business objectives, regulatory requirements, and long-term scalability, increasing recurring revenue by 10% month-over-month; partnered with executive stakeholders to solidify business cases and prioritize transformation initiatives.
- Led enterprise-wide Azure DevOps onboarding and certification program, training and certifying approximately 9,000 practitioners, making the customer one of the largest concentrations of Azure DevOps-certified professionals globally.

Software Development Engineer II 2013–2018

Xbox Store, Microsoft, Redmond, WA

- Delivered high-impact e-commerce features for a large-scale, consumer-facing storefront used by millions, with emphasis on scalability, performance, and accessibility.
- Developed Python-based telemetry pipelines and executive reporting systems enabling data-driven roadmap decisions, while mentoring junior engineers and promoting agile best practices across teams.

CONSULTING *Owner & Principal Consultant* 2022–Present

DrFrankDoes, LLC, Lakeland, FL

- Independent Power Platform and AI advisory practice (the engagement vehicle for the JM Family roles above); released custom connectors integrating existing APIs with Power Platform solutions.

Earlier Experience • *Research Programmer & Tech Lead*, FSU Computer Science (2010–2013); *Microsoft Student Partner*, Florida State University (2012–2013)

- *Android Developer*, iMobile3 (2012); *Software Engineer Intern*, Google (2011)
- *EA Campus Rep*, Tri-Sqox (2004–2011); *Software Engineer II*, ARINC (2007)

EDUCATION Florida State University 2004–2015

- Ph.D., M.S., B.S. in Computer Science
- Research in mobile medical monitoring, computer vision, and applied systems.

CERTS

COLLEGIATE INSTRUCTOR *Adjunct Faculty & Course Founder*, Florida State University 2010–2025

- Designed and taught graduate-level Low-Code Application Development and Mobile Programming, emphasizing developer fluency.
