## PROFILE

AI Enablement and Strategy leader with 20+ years of progressive technology experience, including 5+ years defining and leading AI operating models, governance, and adoption programs across complex, matrixed organizations. Proven track record building AI value dashboards and ROI frameworks, reimagining SDLC and value-stream workflows around AI, and driving culture shifts toward AI-native, AI-fluent teams at enterprise scale. Skilled at influencing senior stakeholders across Product, Engineering, Architecture, and Quality, and at translating executive priorities into sequenced roadmaps with measurable outcomes.

## EXPERIENCE

- Agentic Architect*2025–2026

Professional Services, Microsoft

  - Set AI vision and strategy with enterprise clients, then translated it into multiphase roadmaps, operating models, and governance with clear owners and milestones.
  - Owned KPIs, ROI frameworks, and value-tracking approaches connecting AI initiatives to business outcomes, accelerating delivery timelines by 30%.
  - Established enterprise AI governance (secure landing zones, agent intake, DLP guardrails, ALM) through cross-functional alignment with Engineering, Product, and InfoSec.
  - Owned portfolio view and risk management across concurrent AI workstreams while coaching teams on adoption patterns and sustainable operating rhythms.
- Azure Architect & Cloud Migration Lead*2025

JM Family, Deerfield Beach

  - Owned end-to-end strategy and architecture for large-scale AI and cloud migrations, aligning business owners and engineering on target-state platforms.
  - Facilitated executive and InfoSec alignment on architecture, governance, and data-protection standards prior to deployment.
  - Produced roadmaps, runbooks, and operational playbooks enabling delivery teams to execute with clear ownership and measurable outcomes.
- AI Platform & Power/Copilot Studio Specialist*2023–2025

Northeast Region, Microsoft

  - Defined enterprise AI strategy, governance, and operating models enabling scalable, compliant adoption of custom agents and Copilot capabilities across regulated environments.
  - Built KPI and value-dashboard measures for AI initiatives (productivity, delivery speed, accuracy, MTTR), using them to prioritize use cases and demonstrate ROI to leadership.
  - Designed agent intake, approval, and ALM processes; coached teams on safe self-service patterns and drove measurable adoption gains (80% reduction in manual effort, 40% faster delivery, 70% lower MTTR).
  - Partnered with business and technical leaders to shape platform direction, track adoption and sentiment, and continuously refine the AI operating model based on real outcomes.
- AI Platform & Copilot Consultant*2023

JM Family, Deerfield Beach

  - Established Power Platform and Copilot governance spanning environment strategy, security, connector governance, and DEV/UAT/PROD lifecycle management.
  - Designed intake and approval processes for custom AI agents, including requestor validation and controls to redirect traffic away from default environments.
  - Led client-facing strategy sessions translating business needs into architecture roadmaps, governance frameworks, and acceptance criteria.
  - Mentored junior AI engineers on discovery, ambiguous problem framing, and translating business objectives into actionable engineering requirements.
- Power Platform Lead Architect*2020–2023

Northeast Region, Microsoft

  - Led enterprise digital transformation initiatives, orchestrating business stakeholders,

engineering teams, and platform strategy across multiple industries.

- Delivered success metrics and adoption insights using Power BI and Azure analytics services.
- Mentored architects and developers, fostering a community of practice around scalable low-code and AI solutions.
- Established ALM and governance standards adopted across multiple enterprise customers.

*Cloud Solution Architect, Power Platform Developer*

2018–2020

Strategic Accounts, Financial Services, Microsoft

- Architected cloud solutions aligned to business objectives, regulatory requirements, and long-term scalability for strategic enterprise customers.
- Partnered with executive stakeholders to solidify business cases and prioritize transformation initiatives.

*Software Development Engineer*

2013–2018

Xbox Store, Microsoft, Redmond, WA

- Delivered high-impact e-commerce features for a large-scale, consumer-facing storefront used by millions, with emphasis on scalability, performance, and accessibility.
- Developed Python-based telemetry pipelines and executive reporting systems enabling data-driven roadmap decisions.

## Earlier Experience

- *Research Programmer & Tech Lead*, FSU Computer Science (2010–2013)
- *Microsoft Student Partner*, Florida State University (2012–2013)
- *Android Developer*, iMobile3 (2012); *Software Engineer Intern*, Google (2011)
- *EA Campus Rep*, Tri-Sqox (2004–2011); *Software Engineer II*, ARINC (2007)

## EDUCATION

Florida State University

2004–2015

- Ph.D., M.S., B.S. in Computer Science
- Research in mobile medical monitoring, computer vision, and applied systems.

## CERTS

## COLLEGIATE INSTRUCTOR

*Adjunct Faculty & Course Founder*, Florida State University

2010–2025

- Designed and taught graduate-level Low-Code Application Development and Mobile Programming (Android, Windows), including curriculum focused on developer fluency and hands-on tooling adoption.
